

Reated heat output

cod. 99022020	Less than 100 kW	equivalent to or more than 100 kW
Water hardness to equivalent to or higher than 15°fr	KIT FACILE BravoFIL PLUS da ¾” MiniDUE da ¾”	KIT FACILE BravoFIL PLUS da ¾” BravoCAB MiniDUE da ¾”
Example of installation scheme	A	B

- 1 Raw water inlet
- 2 Flow meter
- 3 Pressure reducer
- 4 Backflow preventer
- 5 Kit Facile
- 6 BravoFIL filter
- 7 MiniDUE dosing pump
- 8 Treated water outlet
- 9 Discharge

- 1 Raw water inlet
- 2 Flow meter
- 3 Pressure reducer
- 4 Backflow preventer
- 5 Kit Facile
- 6 BravoFIL filter
- 7 BravoCAB water softner
- 8 MiniDUE dosing pump
- 9 Treated water outlet
- 10 Discharge

Working

By-pass

KIT FACILE...

for a complete compliance.

- ▶ For a complete and functional installation domestic water treatment plants should always be equipped with a by-pass and sampling taps upstream and downstream the installation
- ▶ With **KIT FACILE** comply with these requirements **it is no longer a problem.**
- ▶ **KIT FACILE** combines in a single device a by-pass and two practical sampling taps to check the effectiveness of the treatment.
- ▶ **KIT FACILE** is designed to simplify and standardize the realization of domestic and civil water treatment plants with semi-automatic self-cleaning filters with $\frac{3}{4}$ " connections, BravoCAB softner and MiniDUE $\frac{3}{4}$ " pump.
- ▶ For the proper fitting of a domestic water treatment plant follows the installation schemes:
